

**PHU N DANG** | dangnphu31@gmail.com

+1 (669) 274-8956 | [pndang.com](https://pndang.com) (portfolio) + /r for real estate & all in 1 resume | [linkedin.com/in/pndang](https://linkedin.com/in/pndang) | [github.com/pndang](https://github.com/pndang)

**PROFILE** - An eager, adaptive, and thoughtful young professional with a multidisciplinary and entrepreneurial record of technical and leadership endeavors, fostering a career synergizing technology with the built world. Known for “skepticism” when handling data, ensuring careful execution and reliable results. Educated in commercial real estate. Possesses extensive practice in data-driven tools, notably statistics, LLMs, NLP, machine/deep learning, business intelligence, digital twins, IoT, data analysis/visualization/ethics.

## EDUCATION

**UNIVERSITY OF CALIFORNIA SAN DIEGO** | GPA: 3.745

**Exp. Graduation Date: June 2025**

**Data Science, B.S. | Real Estate & Development, B.S. | Urban Studies & Planning, Minor**

## SKILLS & ACTIVITIES

- **Tools and Frameworks: Adept:** Python (Pandas, NumPy, Statsmodels, Scikit-learn, RegEx, Matplotlib, Seaborn, Dash/Plotly), SQL, Tableau, GitHub, MS Excel/Word/PowerPoint, CoStar, SketchUp, Unreal Engine 5, Cesium, Vietnamese Bilingual Fluency; **With project/coursework experience:** OOP, R, Java, C/C++, PyTorch, YOLO, Dask, Spark, AWS, Google Maps API, OpenAI API, Flask, Jekyll, HTML + CSS, MATLAB, D3.js + Svelte, NVIDIA DeepStream, Oscilloscope, Embedded Systems
- **Extracurricular Activities: Developing Leader** at NAIOP San Diego, **Etkin Scholar & Shadow Broker** at Urban Land Institute (hands-on with real-world real estate deals), **Player** and prev. **Officer** on UC San Diego Men’s Club Water Polo Team (*2022 National Champion*), prev. **Housing Solutions Consultant & Designer in Residence** at the World Design Organization
- **Certifications:** LLMops – Building Real-World Apps with LLMs (pursuing – by Comet), Business Metrics for Data-Driven Companies (DukeUni), Data Analysis with Python (IBM), MS Office Specialist (Excel), LEED® Green Associate™ (USGBC)
- **Honors/Awards:** Emerging Innovator, 2x UC San Diego PACE Scholarships, ERC Honors Program, Provost Honors, 36<sup>th</sup> URC

## EXPERIENCE

**QUALCOMM INSTITUTE** | Telecom and IT | La Jolla, CA

**Jan 2024 – Present**

**Applied AI & Junior Software Developer** (*Cognitive City Twins*)

- Implemented scalable data integration workflows using blueprints and structs in Unreal Engine 5
- Developed data viz apps using UE5 objects/instanced static meshes with dynamic spawning, scaling, georeferencing
- Implemented Cesium cartographic polygons, raster overlays, and color blending across material layers for tile coloring
- Integrated Google Maps API for a realistic global world as the base for visualization needs in real estate and urban planning
- Utilized Datasmith Exporter plugin to integrate Cesium in Unreal Engine with SketchUp Pro for property modeling
- Built interactive, 3D widgets to display property/urban data, emphasizing user experience and future VR integration
- Developed a framework for building digital twins of buildings in the real world for future placement in the city twins
- Aggregated a large database of the San Diego-Carlsbad region data for future visualization in the cognitive city twins

**BIOKIND ANALYTICS** | Healthcare Data Non-profit | La Jolla, CA

**Sep 2022 – Present**

**President & Lead Data Scientist**

- Manage organizational leadership, budget, marketing, outreach, public relations, and recruitment activities
- Worked with local healthcare non-profits in San Diego on potential avenues for data science to improve operations; targeting ways to help clients improve efficiency, impact, outreach, client satisfaction, ROI, data systems/use case designs
- Oversee and participate in student data science projects to ensure quality, timely delivery, and meeting clients' expectations while upkeeping self; facilitating opportunities for students to apply academic training in impactful, real-world scenarios
- Organize correspondence between members, university faculty, department advisors, and non-profit representatives
- Analyzed large, archived and operational datasets to identify key metrics and actionable insights, leading to improved client understanding of programs, initiatives, grants performance; furthered clients’ mission as data-driven organizations
- Over \$140 million in combined financial analyses performed, ranging from donations to research grants and charity events
- Derived ground-truth insights to clients’ operation with statistical inference, reflected clients’ past operation, checked recent business decisions, and inform future decisions. Performed feature selection/engineering for informative attributes
- Specialize in geo-/demographic, financial, operational & business strategies analyses, dashboarding, turning data to action

**UC SAN DIEGO Urban Studies & Planning** | Academic Department | La Jolla, CA

**Sep 2023 – Jun 2024**

**Affordable Housing Research Assistant & Data Science Fellow** (*Mentor – Dr. Feiyang Sun*)

- Reported affordable housing policy incentives and cost factors, emphasizing public improvements and tax incentives
- Networked with industry professionals to study affordable housing market feasibility, focused on LIHTC and ADUs
- Received sponsorship to network with SDGBC to study green building techniques and integration with affordable housing
- Programmed a bespoke algorithm to parse property data from CoStar into a tabular format for non-commercial purposes
- Applied statistics and machine learning on over 5000 LIHTC projects to derive factors influencing fund allocation
- Utilized analysis methods for social science: feature engineering, clustering, attribute stratification, marginal error analysis

## **NIEMA LAB at UC San Diego | Computer Science & Engineering | La Jolla, CA**

**Sep 2022 – Oct 2023**

### **Data Science Trainee & Researcher** (*Mentor – Dr. Niema Moshiri*)

- Developed an interactive application to visualize Covid-19 time-series data with variant segmentation
- Programmed a bespoke data-smoothing algorithm that selectively reads data upon user requests to optimize runtime
- Reduced initial runtime by 97% (5s to sub-0.1s) with caching/memoization and efficient data structure implementation
- Benchmarked data compression techniques to optimize serialization efficiency and expedite loading speed
- Wrote 7 research notebooks to uncover patterns in 30+ large-scale datasets involving 3000+ cancer patients
- Exceeded 87% accuracy across diverse evaluation metrics, in accurately predicting breast cancer recurrence status
- Analyzed disparities and data collection gaps to ensure ethical and responsible data science practices
- Nominated & gave a conference presentation, special commendation by the Semiconductor Research Corporation

## **GOING SOLO | Business Intelligence & IT Consulting | Johannesburg, South Africa**

**Jun 2022 – Aug 2022**

### **Lead Data Analyst Intern**

- Implemented a character-based word embeddings model to improve words/phrases cognition for text classification
- Developed an automated Bayesian text classifier to streamline data labeling processes
- Analyzed an S&P 500 company's stock/financials and developed an interactive dashboard in Tableau
- Enhanced and maintained a PM dashboard, enabling real-time progress tracking/reporting to supervisors
- Managed projects and led team communications across 7+ time zones for effective collaboration and timely delivery
- ➔ Exceeded internship expectations by proactively implementing an automated data labeling tool with machine learning, effectively saving time and resources, setting new standards for efficiency and problem-solving at the company.

## **DELOITTE Data Science Mentorship Program | Business Consulting | San Diego, CA**

**Feb 2022 – May 2022**

### **Data Science Mentee**

- Utilized ARIMA models to generate employment metric forecasts and predict market behaviors due to Covid-19
- Conducted in-depth analysis to extract actionable insights using multiple linear regression, EDA, and visualization
- Collaborated closely with a mentor from Deloitte, receiving personalized guidance and support on a weekly basis
- Presented findings to an audience of Deloitte practitioners and advisors from the Halicioğlu Data Science Institute
- ➔ Took on a lead role when the team needed leadership, taking charge of task assignments, scheduling meetings, and cultivating a cohesive data story; created a positive, motivated team environment, on-time delivery, & quality assurance.

---

## **PROJECTS**

### **Cognitive City Twins Portfolio** ([pndang.com/projects](https://pndang.com/projects)) | **Team & Personal Project**

Built digital twins for UCSD, Chula Vista, and Hollywood's Vinyl District with Cesium for Unreal. Focused on commercial real estate, property modeling, & urban design applications. Demonstrated how IoT technology and AI can transform the built world.

### **D3 San Diego Multifamily Visualizer** | **Team Project**

A D3.js web app to answer the question "Which San Diego submarket for your next multifamily investment?", data queried from CoStar is visualized on a choropleth map of San Diego, highlighting multifamily vacancy rates, built/renovation year, parking/unit.

### **Who's Dominating the Game** | **Team Project**

A D3.js + Svelte web app showing a temporal analysis of console game genres and publishers' prevalence by sales and crit scores.

### **Statistical Inference for U.S. Presidential Elections** | **Team Project**

A detailed analysis of twelve elections for the U.S. presidency between 1976 and 2020 for a deeper understanding of their nature. Analyses performed include exploratory, goodness of fit (LRTs), similarity/dissimilarity analysis of distributions, predictive (ML).

### **OPUBOD - Occupancy Prediction Using Building Operation Data** | **Personal Project**

A time-series machine learning project to discover relevant building operation metrics to predicting occupancy. Examined models include linear regression, auto-regression, and recurrent neural nets, plus statistical analyses for feature selection.

### **Game Recommender** | **Personal Project**

Performed (1) play prediction using collaborative filtering and (2) hours played prediction using latent-factor models with coordinate descent and gradient descent. All models implemented from scratch with analogous results to the Surprise library.

### **Solar-Powered Smart Lighting for Sustainable Living** | **Team Project**

Built a solar-powered IoT device capable of collecting live sensor data, adjusting lighting, sending data to a MySQL database using MCU Wi-Fi with synchronous communication. Developed a data processing script to query, transform, and visualize data.

### **Exploratory and Predictive Analytics for Precision Medicine** | **Team Project**

A data project for Personalized & Secure Drug Discovery by the Semiconductor Research Corp. Conducted intensive exploratory and predictive analyses to predict breast cancer recurrence using biomarkers, medical, and lifestyle data from over 3,000 patients.

### **Illuminating Cognizance** | **Personal Project**

A look into major power outages in the U.S. to assess statistical relationships, perform hypothesis testing, data missingness audits, and derive predictive power using ML and feature-engineering, built in pipelines with diverse accuracy metrics and evaluations.

### **World Happiness Report 2022** | **Team Project**

Analyzed global happiness using data from the 2022 World Happiness Report to study factors influencing well-being worldwide.
